Zola.com
Frontend Engineer II, Vendor Marketplace
Remote
08/2021 - 11/2022

Zola is an online wedding registry, wedding planner, retailer and marketplace for couples and vendors. I've contributed to Zola's vendor marketplace by shipping features and administrative tools for vendors. I worked with React.js, TypeScript, Next.js, LESS, Redux, React Testing Library, Jest, Java, JavaScript, Node.js, CSS Modules, SQL, Figma, AWS and Selenium Testing.

- Developed both front end implementation and end points for new vendor type (wedding planners) that increased vendor and couples NPS.
- Reduced 90% of form specific tech debt by migrating from redux form to react final form.
- Implemented inquiry flow A/B/C experiments for couples that increased conversion rate by 20%.
- Shipped frontend reskins, increased test coverage, and converted files from Javascript to TypeScript and LESS to CSS modules, which increased developer experience.
- Optimized large queries for critical data on backend using Java.
- Contributed technical assessment during product kick off and software estimation.

Happy Cog
Frontend Engineer
Remote
08/2020 - 06/2021

Happy Cog is a digital agency that designs, builds, and markets websites, apps, digital products, & experiences. I've contributed to multiple clients while working at Happy Cog, including Digg Inn and Braze. I worked with React.js, TypeScript, Craft CMS, Twig, JavaScript, React Native, Styled Components, Redux Saga, CSS, and AWS.

- Built and architected greenfield take out food app using React, TypeScript and Redux Saga.
- Mentored team's first summer engineering intern and received positive feedback from direct manager.
- Reduced tech debt by 20% and implemented reusable components in multiple clients design system.

InRhythm via Goldman Sachs
Associate Software Engineer
New York, NY
01/2020 - 03/2020

InRhythm is a software consult, that contracts engineers to Goldman Sachs and other fortune 500 companies. I've contributed to Goldman Sach's e-trade platform, Marquee. I worked with React.js, TypeScript, Redux, Mobx, CSS and JavaScript.

- Shipped multiple bug fixes for Marquee e-trade platform.
- Implemented test coverage and unit tests on commodity side of platform.

SoulCycle
Associate Software Engineer
New York, NY
10/2018 - 01/2020

SoulCycle is a fitness company owned by Equinox Group which offers indoor cycling and spinning workout classes. I've contributed to SoulCycle's main platform, soulcycle.com, their UI kit and an internal marketing app. I worked with React.JS, Node.JS, JavaScript, SQL, Twig, PHP, HTML, JQuery, CSS, Sequelize, and Jest.

- Shipped bug fixes to existing e-commerce, soulcycle.com.
- Implemented multiple reusable components for SoulCycle's UI kit using React.
- Implemented search and list for class packages for marketing app, including edit, delete and new class packages.

Software Development Intern
New York, NY
08/2017 - 05/2018

I studied alongside one of SoulCycle's Senior web developer. In this time I focused on learning the fundamentals of JavaScript and programming.

- Implemented unit test in product pages, increasing test coverage.
- Refactored legacy code that was using JQuery.
